

# Discover With Diane...

WINTER & SPRING, 2017

## A Note From Diane

## “Hooked on Travel”

Did you know that in the fishing world, there is a “season” or a “limit” for most types of fish species? I realize these rules are made to protect the fish, but let’s look at this from the fish’s point of view. Can you imagine treading water at home,

waiting for someone to come along, pull you out, and give you an opportunity to see the world? Neither can I! And if that hook, line and sinker happens to drop in your pond and you hesitate a frog’s hair too long...guess what...that boat might sail on without you! Let me just say that Discover Clubbers are proof that travel has no “season”. From January through December, if they aren’t on the move, they’re planning the next adventure. The Discover Club species also knows that the sky is the “limit” when traveling. There are uncharted waters out there and we are exploring them together in “schools”, I mean groups 😊 . It’s always smooth sailing when you travel with us!
